

SWANSON, MARTIN & BELL, LLP

Depth of Courtroom Expertise

SWANSON, MARTIN & BELL, LLP IS a 90-attorney litigation firm with its principal office in Chicago. The firm focuses its practice on all aspects of litigation and trial work, including defense of product liability, professional negligence and major casualty and construction litigation matters. Swanson, Martin & Bell also handles many other types of disputes for its clients in areas such as mass toxic tort defense, commercial litigation, environmental litigation and intellectual property disputes.

The firm prides itself on the depth of litigation and trial experience among its partners and associates and is dedicated to resolving contested matters for its clients—by trial if necessary. While many matters resolve expeditiously through early dismissal or business resolution, it is reassuring for the firm's clients to know that if the matter goes to trial, the firm's lawyers have tried hundreds of jury trials to verdict. This expertise distinguishes Swanson, Martin & Bell from other firms, enabling it to successfully represent its many national, regional and local clients.

Swanson, Martin & Bell, LLP represents its clients in an efficient, cost-effective manner, delivering excellent legal representation at an affordable cost, often significantly lower than other large firms.
